

## A sport born in the USA

111111111

Basketball was invented in December 1891 by James Naismith, a Canadian-American physical education teacher at Springfield College in Massachusetts (United States).

After ruling out certain games that were not suitable for indoor play, he took up the idea of an ancient Mayan ball game (Pok-ta-pok) and placed two peach crates on the gym's handrails, at a height of 3.05 meters (ten feet).

The aim of the game is to throw a ball into these wooden crates to score a "basket." Translated with DeepL.com (free version)
